

How to Make a Flower Crown

You will need:

A strip of card, long enough to wrap around your head;
sticky tape, scissors, glue, flowers and leaves to decorate.

Cut a strip of card and measure it around your head to make sure it is long enough.

Put the card on a flat surface and stick the petals and leaves down to decorate your crown. Leave a space each end so you can stick the ends together when you are finished.

Ask a grown up to measure the crown around your head and stick the ends together.
